Professional profile

Results-driven Physicist and R&D Engineer with 10+ years of expertise in optical system design, automated instrumentation, and advanced data analytics. Proven track record of translating high-level research challenges into robust automated setups and executing projects within a €150K+ budget. A proactive, cross-functional leader focused on optimizing R&D workflows and delivering impactful results.

Professional Experience

Postdoctoral Fellow | Radboud University
Nijmegen, Netherlands, 2022 – Present

- Lead end-to-end experimental R&D projects in ultrafast laser-matter interactions and femtomagnetism, successfully delivering high-impact publications (Nature Physics, Phys. Rev. Letters, etc).
- Spearheaded the migration of experimental setups automation from LabVIEW to Python, accelerating software development and data analysis pipelines for a team of Python-ready students.
- Direct daily workflows and technical mentoring for a team of PhD candidates, optimizing laboratory resource allocation to ensure on-schedule project delivery.

Senior Research Fellow | Ioffe Institute
St. Petersburg, Russia, 2017 – 2022

- Managed a key research line, successfully securing and allocating a €150K+ budget for infrastructure development and operations.
- Planned and supervised the construction of two experimental lab rooms for femtosecond optical spectroscopy and microscopy, managing full lifecycle equipment procurement and vendor vetting.
- Engineered custom automation software for ultrafast optical spectroscopy systems, significantly increasing data acquisition and processing efficiency.
- Supervised and mentored a team of 2 PhD and 5 MSc students, guiding them through successful on-schedule project delivery.

Research Fellow | Russian Quantum Center
Moscow, Russia, 2013 – 2017

- Engineered instrumentation interfaces and control architectures

Technical proficiencies

- Optical Spectroscopy
- Laser systems & photonics
- Solid state physics
- Python, Matlab, LabView, C#, OOMMF
- System automation

Professional competencies

- Project management & workflow optimization
- Team leadership & mentorship
- Grant writing & budgeting
- Design of educational courses & training

Languages

English, Russian (Native),
Dutch (A1)

Education

Ph.D. in Physics
Moscow State University, Russia,
2011 – 2015

M.Sc. Equivalent (Specialist)
Moscow State University, Russia,
2005 – 2011

Hobbies

Fencing (épée),
hiking/backpacking (guide license),
roller skating (coach license),
skiing, climbing, painting

- using Matlab and LabView for complex optical measurements.
- Planned, vendor vetted and supervised the construction of lab room for magneto-optical spectroscopy.

Additional Professional Experience

Invited Associate Professor | ITMO University
St. Petersburg, Russia, 2018-2022 (part-time)

- Engineered and delivered specialized technical training curricula in Micromagnetics and Magnetophotonics for MSc students.

Video Engineer | Innovative Medical Technologies Ltd
Moscow, Russia, 2016 – 2020 (part-time)

- Designed and deployed robust hardware-software network infrastructure for low-latency video streaming and multi-room synchronization across surgical environments.
- Maintained network infrastructure during medical broadcasting conferences, ensuring 99.9% system uptime during live surgery.
